Welcome to Assessment Without Testing™

Lexia Reading's powerful progress monitoring tools allow you to quickly assess student performance without stopping instruction time for testing. You can easily view current data about time on task, skill development, and overall progress, and pinpoint the exact areas in which students are struggling. Learn how to interpret the four sections of your Home Page so that you can integrate this information into your instruction.

Login to www.mylexia.com to monitor your students' progress on your Home Page.

Quick Guide

for Teachers with Class Access

1 Instruction Needed

“Who is struggling and needs instruction?”

The Instruction Needed list displays all students in your class who are struggling with an activity and may require explicit teacher-directed instruction in order to progress. Students are grouped according to the program level and skill(s) in which they are struggling in order to facilitate small-group instruction.

- ▶ Click the **skill name** to view a Lexia Lesson PDF that you can use in teacher-led instruction with your students.
- ▶ Click the **student name** to view a Student Skills Report for a detailed look at the student's current and past performance.

Click **Detail** to view the Class Skills Report, an overview of student performance in current and completed tasks.

2 Lexia Benchmarks or Lexia Skill Set

“How is my class doing right now?”

This pie chart displays either Lexia Benchmarks (for Grades K-3) or Lexia Skill Set (Grades 4 and above). The chart is a snapshot of today's data and includes only students who have used Lexia Reading at least once in the past 8 weeks.

Lexia Benchmarks (K-3) measure a student's ongoing progress in comparison to grade-level peers in the representative Lexia sample. The student's current program level is compared to the Lexia Benchmark for that grade and month of the school year:

At/Above: Student is working at or above the level completed by less than 60% of the Lexia sample.

Below: Student is working below the level completed by 60-80%.

Well Below: Student is working below the level completed by more than 80%.

Lexia Skill Set (Grades 4+) provides an estimate of the skill level that the student is working on, based strictly on the student's current program level:

Intermediate: Skills approx. 4th-6th grade level (Strategies for Older Students Levels 4 & 5)

Elementary: Skills approx. 2nd-3rd grade level (SOS Levels 2 & 3)

Basic: Skills approx. K-1st grade level (SOS Level 1 or lower)

Click **Detail** to view the Class Progress Report, which allows you to gauge class and individual student progress over time.

3 Usage

“Are students using Lexia Reading at the recommended levels?”

The Usage Line Graph displays the average minutes per week of use for the entire class. The blue-shaded area indicates the recommended level of usage as determined by gains seen in research. This graph includes all students in your class who have used Lexia Reading at least once in the past 8 weeks.

Click **Detail** to view the Class Usage Report, which displays each student's average weekly and total minutes.

4 Class Table

“How is each student in my class doing right now?”

The Class Table provides a concise overview of your class by reporting each student's current status with the following information:

! If the student is struggling, the **Instruction Needed** icon will display.

Name: Click the student's name to view a Student Skills Report for a detailed look at the student's current and past performance.

Grade: The student's current grade.

The student's current status for **Lexia Benchmark** or **Lexia Skill Set** will display. If the student hasn't used Lexia Reading in the past 8 weeks, then NA displays.

Student Usage: The student's average weekly program usage over the past 8 weeks.

Current Assignment: The student's current program assignment. Each student should have only one assigned level at a time.

If the student is struggling in one or more units, this icon will display in the **Lessons** column. Click this icon to view a Lexia Lesson PDF that you can use for teacher-led small group instruction.

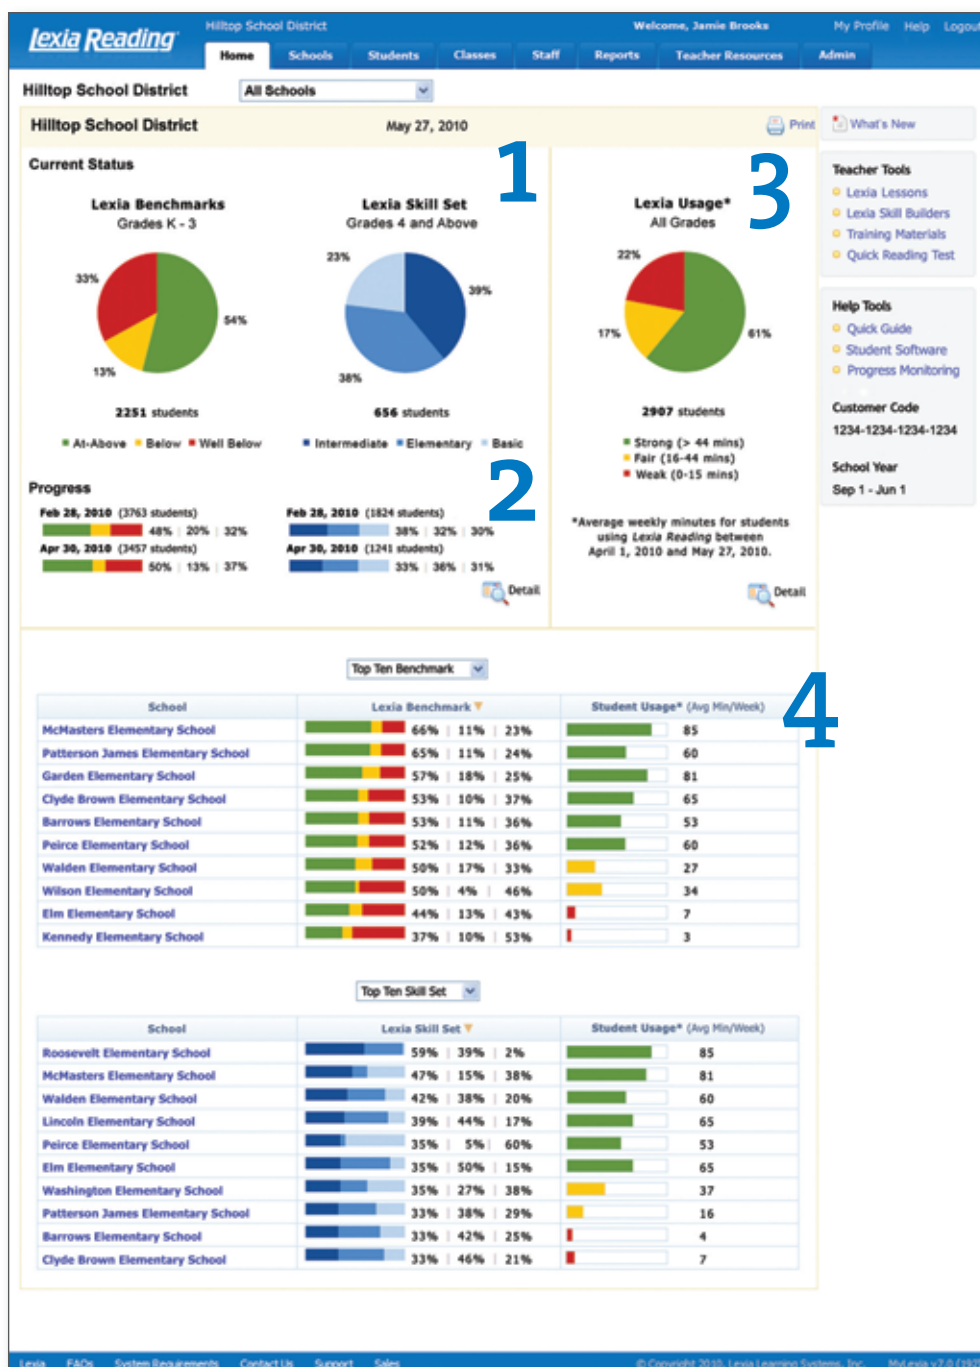

If the student has completed a program level in the past 2 weeks, this icon will display in the **Certificate Available** column. Click this icon to view the Achievement Certificate PDF, which is pre-populated with the student's name and ready to print.

Home Page

Welcome to Assessment Without Testing™

Lexia Reading's powerful progress monitoring tools provide an on-demand look at current aggregated data for your district or school. Your Home Page features four sections of information about usage, skill attainment, and progress. Learn how these four sections allow you to assess the current status of your district or school – all without stopping instruction time for testing.

Login to www.mylexia.com to monitor your school or district's progress on the Home Page.

Quick Guide

for Educators with District
or School Access

1 Current Status

“How are students doing right now?”

The Lexia Benchmarks and Lexia Skill Set Pie Charts display a snapshot of today's data and include only students who have used Lexia Reading at least once in the past 8 weeks.

Lexia Benchmarks (K-3) measure a student's ongoing progress in comparison to grade-level peers in the representative Lexia sample. The student's current program level is compared to the Lexia Benchmark for that grade and month of the school year:

At/Above: Student is working at or above the level completed by less than 60% of the Lexia sample.

Below: Student is working below the level completed by 60-80%.

Well Below: Student is working below the level completed by more than 80%.

Lexia Skill Set (Grades 4+) provides an estimate of the skill level that the student is working on, based strictly on the student's current program level:

Intermediate: Skills approx. 4th-6th grade level (Strategies for Older Students Levels 4 & 5)

Elementary: Skills approx. 2nd-3rd grade level (SOS Levels 2 & 3)

Basic: Skills approx. K-1st grade level (SOS Level 1 or lower)

2 Progress

“Are students making progress over time?”

The Progress section displays the percentage (%) of students in each Benchmark and Skill Set category in 2-month intervals. As the school year progresses, you can gauge student progress by monitoring how the percentages of Benchmark and Skill Set categories are increasing or decreasing.

Progress is measured monthly and displayed in 2-month segments, and includes all students who used the program at least once in that time period.

Detail

Click **Detail** to view the District or School Progress Report, which breaks down monthly Benchmark and Skill Set percentages by either school or class.

3 Usage

“Is Lexia Reading being used at the recommended levels?”

The Usage Pie Chart displays student program usage based on the average weekly minutes for the past 8 weeks:

Strong: 45 minutes or more per week (recommended usage)

Fair: 16-44 minutes per week

Weak: 0-15 minutes per week

The Usage Pie Chart includes all grades, and therefore the number of students will total the number of students in the Benchmark and Skill Set charts. This chart includes only students who have used Lexia Reading at least once in the past 8 weeks.

Detail

Click **Detail** to view the District or School Usage Report, which breaks down usage minutes by either school or class.

4 School/Grade Tables

“Which schools/grades are doing well/not well?”

“Where should I focus my resources?”

The school/grade tables provide a concise overview of a district or school's current status. These tables feature the most recent snapshot of Benchmark, Skill Set, and Usage data.

District users can view the top/bottom ten schools for Benchmarks, Skill Set, and Usage. Click any school name to view a School Combined Report (i.e., all of the school's Current Status, Progress, and Usage information.) You can sort the list by clicking any column header.

School users can view grades. You can sort the list of grades by clicking any column header.
